ABOUT US

Shinn Fu Australia was established in 1994, as a subsidiary branch office of Shinn Fu Corporation Taiwan. The infrastructure of Shinn Fu Australia now boasts experienced marketing, sales, technical, and management staff to provide value added localised support to its continually expanding market.

Continued product development, and range expansion programs has created a wide retail customer base, which has enabled the Australian subsidiary operation to access a new market in the Australasian region. Our major brand name PROLIFT supports the retail and home D.I.Y customer base.

The expansion of Shinn Fu Australia's operation has seen the company enter the professional and industrial market with the Omega and BVA branded product lines.

Omega, Shinn Fu's premium line hydraulic automotive lifting equipment, was launched in 1997 and immediately received international recognition for its exceptional quality standards and innovative features. The continuous improvement of the quality and feature of the Omega range form the basis of Shinn Fu Australia's steady growth.

Increased awareness of Occupational Health and Safety and mandatory Consumer Safety guidelines has provided Shinn Fu Australia an additional platform to effectively market its product range. Shinn Fu's commitment to product compliance with local safety standards and mandatory regulations ensures our continued supply of quality products with elevated integrity.

In 2004, Shinn Fu Australia introduced its high quality BVA industrial hydraulic equipment range. Manufactured in ISO 9001/9002 certified facilities with major investments such as metallurgical microscope and robotic welding machines to ensure metal quality and assembly precision, BVA represents Shinn Fu's next phase in continuing its global presence on the hydraulic market.
